

HANDS -ON FIRE PUMP TRAINING CLASS

FREE

**Friday
April 29, 2022**

8:00 am - 12 Noon

COURSE DESCRIPTION

Learn the proper procedures for completing NFPA 25 code required weekly and monthly fire pump runs. Routine pump runs are key to the overall life expectancy of your equipment and ensure that your pump will stand ready to perform when called upon in the event of an emergency. This extensive course includes classroom time to review the history of fire pumps and a brief overview of their internal components and how they work, as well as hands on training with the working fire pump in the wet lab. All attendees shall receive a certificate of attendance from SPP Pumps and will leave feeling more confident on how to properly exercise and maintain the fire pump within the building they maintain or manage.

INSTRUCTOR: Chris Dilday

Chris has worked in fire protection industry and has been with SPP Pumps for 16 years. As National Sales Manager he travels throughout the US educating Life Safety Professionals and contractors about fire pumps and representing SPP Pumps. In addition, Chris served our country in the Army and has been an active member of the Georgia Army National Guard for the past 19 years. He has a wife, Shannon and 2 children.
